

AGRICULTURE & GRAIN HANDLING

ANIMAL NUTRITION SYSTEMS

OSWAR
rotocorp

Feed processing plants handle a wide range of raw materials including maize, soybean meal, bran, oilseed cake, additives, minerals, and micro-ingredients. Consistent material flow and accurate batching are critical to ensuring uniform feed formulation and nutritional value.

Oswar Rotocorp provides engineered flow control solutions designed for bulk raw material discharge, pneumatic conveying, batching systems, and feed pellet production lines. Our equipment integrates into storage silos, grinders, mixers, and pellet mills while maintaining controlled discharge and efficient airlock performance.

BUILT FOR ACCURACY, RELIABILITY & CONTINUOUS OPERATION

Feed manufacturing requires accurate volumetric feeding and consistent material transfer to maintain formulation integrity. Equipment must operate reliably under continuous production schedules while handling free-flowing grains and fine additives. Rotary Valves are engineered for uniform discharge and stable airlock performance in pneumatic conveying systems. Optimized internal clearances support precise material feeding to mixers and pellet mills.

SOLUTION PORTFOLIO INCLUDES:

- Rotary Valves for Grain & Additive Handling
- Pneumatic Conveying Rotary Valves
- Precision Feeding Rotary Valves
- Slide Gate Valves for Silo Isolation
- Diverter Valves for Multi-Line Routing
- Flap / Gravity Gates for Dust Applications

SUPPORTING SAFE & HIGH-QUALITY FEED PRODUCTION

- **Uniform & Controlled Material Feeding**
- **Improved Airlock Efficiency**
- **Reduced Dust & Material Loss**
- **Stable Operation Under Continuous Load**
- **Lower Maintenance Frequency**
- **Extended Equipment Service Life**
